02 · Lesson spec

Assessment (observation + practical) · 40 minutes per period · 3 rotating stations · no written test · MVL recorded

Goal	Every child is seen on the 4-item Term 3 checklist, and the Nursery 1 MVL is recorded, by the end of the week.
Core part	Practical check (Station 1)
Per period	Tick the checklist for **8–12 children** at Station 1. Repeat periods until every child has been seen.
Materials	Station 1 kit (problem cards, shop step cards, walk-straight and go-round cards, a box on a mat, the W11 ramps and toy car); record sheets (Guide 05); Station 2 taped route and road-closed box; Station 3 paper and crayons; three station signs

1. Warm-up (5 min)

- One quick whole-class **Robot Says** round: walk → stop → wave. Keep it light: “Let’s play our Ayo games today!”
- Explain the three stations and the two-clap signal. Never call it a test.

2. Station rotation (30 min)

Station	Who runs it	What children do
1 · Thinker game with Teacher	Teacher	The 4-item sequence (script below), about 4 minutes per small group of 3–4
2 · Road closed practice	Assistant, or self-running	Walk a taped route; swap in go round when the box appears; **not judged**
3 · Me as a thinker	Self-running	Draw “Me as a thinker” on the Review sheet

- Groups of 4–6 rotate on two claps (about 10 minutes per station). At Station 1, take **3–4 children at a time** so each child does the 4 items.
- Record **E / D / S / X** for each item straight onto the record sheet. Do not correct the child during the check; help afterwards if needed.

3. Close (5 min)

- Children show their “Me as a thinker” drawings to a friend.
- **Say:** “You showed me so much! Next week is our showcase and badge day: the last week of Nursery 1!”

Station 1 · the 4 items (say exactly this)

1. ① Show a problem picture (e.g. the blocked path). “What is the problem?” Then, **before showing any cards**: “Tell me 3 small steps to wash your hands.”
2. ② On the mat: a box blocks Ayo’s path and the plan shows “walk straight”. “The road is closed. What will you do?” (swaps in “go round” and walks it)
3. ③ At the group’s W11 ramp (or tower): “Test it.” If it fails: “What will you change?” (adds a block and tests again). If it works first time, move one block so it wobbles and ask again.

4. ④ **MVL:** “Put Ayo’s shop trip in order.” (leave home, buy bread, go home, mixed) Then swap two: “Silly Ayo swapped two cards. Can you fix them?”

Extending (optional, no effect on the badge): give an unfamiliar 3-step routine (e.g. plant a seed: dig → seed → water) and ask the child to order it and fix a swap.

Common mistakes when assessing

- Showing the cards before item ① → the child must name the 3 steps **aloud first**.
- Helping during the check → let the child try first; a prompt makes it “Developing”, not wrong.
- Assessing Stretch work → Stretch is never assessed; celebrate it at the showcase.
- Long one-to-one sessions → small groups, about 4 minutes; 8–12 children per period.

What if it doesn’t work?

- No assistant for Station 2 → make it self-running: children take turns as the road-closer with the box.
- A group’s W11 ramp is gone → use a teacher ramp (plank on one block) for item ③.
- Some children not yet seen → check them on Week 13 morning before the badge ceremony.

> **Safety**
> Stations spread out; walk between them; big blocks only; no climbing on ramps; car wheels checked; Robot Says moves stay small.
