02 · Lesson spec

Try Another Way · 40 minutes · whole class, then teams of 4–6 · fully unplugged

Goal	**I can try another way.**
Core parts	Move + Code
Key words	blocked · another way · try again · go round
Materials	Taped route on the floor grid; a light “road closed” box with sign (Printables); “walk straight” and “go round” cards (new); blocked-path mats; big blocks; cardboard Ayo; a star target

1. Watch (5 min)

- **Show:** cardboard Ayo walks the taped route… a fallen tree (a box) is in the way! “Oh no, the path is **blocked**. Does Ayo give up?”
- **Ask:** “What else can he try?” Show the two cards: “walk straight” and “go round”. “Which card do we need now?”
- **Model the fix:** take out “walk straight”, put in **“go round”**, then walk it to test: “It worked! We tried **another way**.”
- **Hand signs:** blocked = palm flat out, “stop” · another way = point one way, then the other · try again = roll your hands · go round = draw a curve in the air.

2. Do in groups (25 min)

a) Road closed, whole class (10 min) · Core: Move

- Children walk the taped route in a line. The teacher puts down the “road closed” box. Children stop, say “Blocked!” and **find a way round**.
- Move the box to a new place and go again: each time, the class finds a new way.

b) Swap the card, teams (10 min) · Core: Code

- Each team has a blocked-path mat and a plan with a “walk straight” card. **Replace** it with the “go round” card, then walk the plan on the floor to **test** it.
- **Practical:** teams find **two different routes** to the same star; each route is walked and checked.
- **Stretch:** find two other routes.

c) Activity Book page (5 min)

- Draw a different way round the block. Not marked.

3. Share (10 min)

- **Create:** draw Ayo going a different way.
- Optional Build: build the roadblock from blocks (keep it low).
- **Close:** “When the way is blocked, we don’t give up. We try another way!”

Common mistakes

- **Giving up** (“Ayo can’t go”) → “Is there another way? Look around the box.”
- **Walking through the block** → “Can Ayo walk through a tree? Find a way **round**.”

- Changing the whole plan instead of one card → “Which card is the problem? Change just that one.”

What if it doesn’t work?

- No box → a chair or a pile of cushions as the roadblock.
- No tape → chalk lines or a rope path.

Support and stretch

- **Support:** hold up both cards and ask “Straight or round?”; walk it together.
- **Stretch** (optional, never assessed): find two other routes.

How we check

Observation only. Tick each child who **finds another route when the path is blocked**.

> **Safety**
> The roadblock is a light, empty box: walk round it, never climb or kick it. Blocks stay low. Walk, don’t run.
