02 · Lesson spec

Practice & Play: Solve a Big Challenge · 40 minutes · teams of 3 · two tasks at once · fully unplugged · no new concept

Goal	**I can plan and solve a challenge with my team.**
Core parts	Move + Code
Key words	plan · challenge · obstacle · team
Materials	One teacher-made floor course (table, boxes, tape line, W5 ramp); a paper copy of the course per table; step cards, plan cards and go-round cards (Printables); cardboard Ayo with paper bread

1. Watch (5 min)

- **Say:** “Ayo must deliver bread through an **obstacle** course. That’s a big **challenge**! Let’s use everything we learned this term.”
- Ask the four questions, with a finger for each: **What is the problem? What are the small steps? Which way is best? What if it is blocked?**
- Show the course and its paper copy. Point to each obstacle: crawl under the table, walk around the boxes, step along the line.
- **Safety rules (say them together):** floor level only, no climbing, 6 on the course at a time, walk.

2. Plan and walk (25 min): two tasks at once

Task 1 · At tables: plan and test (Core: Code)

- Teams of 3 lay **3 step cards** on the plan card **before anyone moves** (e.g. crawl under → walk around → step along the line).
- Test the plan by moving cardboard Ayo on the paper copy of the course. Fix any wrong card.

Task 2 · On the floor course: walk it (Core: Move)

- Two teams at a time (**no more than 6 children**) walk the course following their plan, then swap with a planning team.
- **Blocked!** The teacher puts a box across one part. The team changes the plan: swap in the **“go round”** card and test again.
- The teacher **photos** each team’s plan card and their walk (evidence).
- **Stretch:** add a second obstacle (e.g. the W5 ramp: roll Ayo’s bread down it).

3. Share (10 min)

- **Activity Book page** (4 min): draw Ayo’s way through the course. Not marked.
- **Create:** draw your team’s obstacle course.
- **Close:** “Plan it, test it, fix it, together! Next week Ayo delivers the bread for real.”

Common mistakes

- Walking before planning → “Plan first: 3 cards on the plan card.”
- Changing the whole plan when one part is blocked → “Which card is blocked? Swap just that one.”
- Crowding the course → “Six on the course; the others plan.”

What if it doesn’t work?

- No suitable table → a sheet over two chairs as a tunnel (adult sets it up).
- Small room → do Task 2 as a teacher demo with one team, others watch and check.

Support and stretch

- **Support:** give the first card; the team chooses the next two.
- **Stretch** (optional, never assessed): add a second obstacle.

How we check

Observation only. Class checklist (Guide 05): plans 3 steps, tests with Ayo, tries another way when blocked, works with the team. Photo each team.

> **Safety**
> Floor level only. No climbing on boxes or the table. At most 6 children on the course. Adults move boxes and tables. One way round.
