05 · Teacher and parent guide

Part A is for the teacher (with the class checklist). Part B is the take-home note for parents and carers.

Part A · For the teacher

This week in one line: no new ideas. Teams put all of Term 3 together on one floor-level obstacle course: name the problem, plan 3 small steps, choose the best way, test, and change the plan when it is blocked.

Get ready (before class: about 20 minutes)

- **Set out ONE floor-level course:** a sturdy table to crawl under (nothing on top), 2–3 light boxes to walk around, a taped line to step along, and the W5 block ramp. One way round, no crossing paths.
- **Draw a simple paper copy** of the course for each table (or print the plan card and sketch the course on it).
- Print the step cards, go-round cards and plan cards (Printables PDF). Make paper bread for cardboard Ayo.
- Read the lesson spec the evening before and lay out the cards.

Running two tasks at once

- Half the teams plan at tables; up to 2 teams (**6 children max**) walk the course. Swap on two claps.
- Stand near the course: you add the “blocked” box and watch each team change its plan.

> **RhinoBot tip**
> This is your last practice week before the Week 12 check. Note anyone who still needs help planning 3 steps or swapping one card; give them extra turns in Week 10.

Class observation checklist (tick ✓ when seen; leave blank if not yet)

Name	Plans 3 steps before moving	Tests the plan with Ayo	Tries another way when blocked	Works with the team

Name	Plans 3 steps before moving	Tests the plan with Ayo	Tries another way when blocked	Works with the team

Observation only, not marked. Photo each team's plan.

Part B · Take-home note for parents and carers

This week your child's team solved a big challenge: they planned 3 small steps to get Ayo's bread through an obstacle course, tested the plan, and changed it when the way was blocked.

Try this at home (5 minutes)

1. Make a mini course: crawl under a chair (an adult holds it), walk round a pillow, step along a line of tape or string.
2. Ask your child to plan first: "What are the 3 steps?" Then do it together.
3. Block one part and ask: "What other way?"
