02 · Lesson spec

I Can Do Things in Steps · 40 minutes · whole class, then groups of 4–6 · fully unplugged

Goal	**I can follow 3 steps in order.**
Core parts	Move + Code
Key words	step · first · next · last · order
Materials	3 large morning-routine cards per group (wake up, brush teeth, eat breakfast); 3 big step cards (clap, stamp, turn); masking tape; cardboard Ayo

1. Watch (5 min)

- **Show:** cardboard Ayo and the 3 routine cards, in order.
- **Say:** “This is Ayo. Every morning Ayo does things in steps. First he wakes up. Next he brushes his teeth. Last he eats breakfast.”
- **Ask:** “What does Ayo do first?” Point to each card as children answer.
- **New words with hand signs:** first = one finger · next = two fingers · last = a wave.

2. Do in groups (25 min)

a) Robot Says, whole class (10 min) · Core: Move

- **Say:** “Robots do steps in order. Let’s be robots!” Hold up the cards: clap → stamp → turn.
- Children do the three actions in order. Change the order (turn → clap → stamp) and go again.
- After 2–3 rounds, a confident child holds up the cards. (They only show cards; giving commands starts in Week 3.)

b) Order the morning, groups (10 min) · Core: Code

- Each group gets the 3 routine cards, mixed up. **Say:** “Help Ayo! Put his morning in order.”
- Children lay the cards left to right under the taped arrows 1 → 2 → 3.
- **Expect:** most groups get first and last quickly; some swap the middle two.

c) Activity Book page (5 min)

- Circle what comes first; match each step to its picture. Not marked.

3. Share (10 min)

- Two groups “read” their cards aloud: “First… next… last…”
- **Ask:** “What if Ayo ate breakfast before waking up?” Let them laugh: order matters.
- **Create** (if time allows): draw three steps of something you do every day.
- **Close:** “Today we were robots! We did things in steps.”

Common mistakes

- Children do all three actions at once → slow down: one card, one action, pause.
- Cards laid right to left → point to the 1 → 2 → 3 arrows on the tape.

What if it doesn't work?

- A group is stuck → hold up the first card only: "What comes after this?"
- No printed cards → draw the three pictures on the board or paper.

Support and stretch

- **Support:** start with 2 cards, then add the third.
- **Stretch** (optional, never assessed): follow 4 steps, e.g. clap → stamp → turn → sit.

How we check

Observation only. Tick each child who **follows a 3-step instruction in order** during Robot Says.

> **Safety**
> Large cards only (no small pieces). Keep the space clear and turn slowly on the spot.
