02 · Lesson spec

Patterns Are Everywhere · 40 minutes · whole class, then teams of 4–6 · fully unplugged

Goal	**I can find patterns around me.**
Core parts	Move + Code
Key words	fabric · nature · Ankara · pattern · find
Materials	Clear 2-part samples (striped cloth, zebra picture, 2-colour tiles, a striped uniform); Ankara or adire and a pineapple (or picture) for look-and-talk; AB colour cards and sample cards (Printables); one pattern-hunt sheet per team

1. Watch (5 min)

- **Show** a striped uniform, a zebra picture and 2-colour floor tiles. **Ask:** “What repeats?” Run your finger along: “blue, white, blue, white…”
- **Look and talk:** show Ankara (or adire) fabric and a pineapple. “What shapes can you see? Do you see anything again and again?” No cards for these: just talk.
- **Say:** “Patterns are everywhere! Today we are pattern hunters, like Ayo with his magnifying glass.”
- **Hand signs:** find = hand over eyes like looking far · pattern = draw waves in the air · fabric = rub fingers together · nature = arms up like a tree.

2. Pattern hunt (25 min)

a) Pattern walk, teams (10 min) · Core: Move

- Teams walk around the classroom with their hunt sheet: floor tiles, window bars, a uniform, fabric on the display.
- Each team finds **2 patterns** and shows them to the teacher. Then the team **copies one with their bodies** (e.g. stripes: stand, crouch, stand, crouch).

b) Copy it with cards (10 min) · Core: Code

- Each team gets a clear 2-part sample (striped cloth, zebra, tiles or uniform). Find the part that repeats and **copy it with AB cards**: red, yellow, red, yellow…
- Show it to Ayo (cardboard): “Ayo, look! Our pattern is red, yellow, red, yellow!”
- **Stretch:** find the repeating part in an Ankara or adire fabric, or a pattern in a machine (a fan, a washing machine drum), and say its rule.

c) Activity Book page (5 min)

- Circle the patterns in the pictures. Not marked.

3. Share (10 min)

- Teams show their 2 patterns; the class says the repeat together.
- **Create:** draw a pattern you found at home or school (or finish at home).
- Optional Build: start a class pattern display with fabric pieces children bring in.
- **Close:** “Patterns are everywhere! Smart thinkers notice repetition.”

Common mistakes

- Calling any colourful thing a pattern → “Does something repeat? Show me the part that comes again.”
- Trying to copy Ankara with cards → “Ankara is for looking and talking. Let’s copy the stripes.”

What if it doesn’t work?

- Not many patterns in the room → bring in clothes, a striped mat, or print the sample cards.
- Team too noisy → do the pattern walk as a whole class, then cards in teams.

Support and stretch

- **Support:** give the child a 2-colour striped cloth and say the colours together while pointing.
- **Stretch** (optional, never assessed): find the repeating part in Ankara or adire, or in a machine, and say its rule.

How we check

Observation only. Tick each child who **finds a pattern in familiar objects and copies it**.

> **Safety**
> Walk on the pattern walk. Stay with your team inside the classroom. Look at window bars, don’t climb them. An adult handles the pineapple.
