02 · Lesson spec

Choose the Right Way · 40 minutes · whole class, then pairs · fully unplugged

Goal	**I can choose the safe way.**
Core parts	Move + Code
Key words	choose · safe · danger · zebra crossing · why
Materials	Two taped routes to one box (one past a paper zebra crossing, one across a “busy road” strip); choice cards and two-route mats (Printables); cardboard Ayo; thumbs-up card

1. Watch (5 min)

- **Show** the two route pictures. **Say:** “Ayo wants to get to the shop. He can cross at the **zebra crossing**, or run across the busy road. Which is the **right way**? **Why**?”
- Agree: the zebra crossing, with a grown-up, is **safe**; running across the busy road is **danger**. Cars stop at the zebra crossing.
- **Hand signs:** choose = point with one finger, then the other, then pick · safe = arms hug yourself · danger = hands up, “stop!” · zebra crossing = draw stripes in the air · why = shrug, palms up.

2. Do in groups (25 min)

a) Two-route walk, whole class (10 min) · Core: Move

- Two taped routes lead to the same box: one past the paper zebra crossing, one across the “busy road” strip.
- Each child points to both routes, **chooses** one, **walks the safe one** and says why: “Because cars stop at the zebra crossing.”
- Nobody walks on the busy road strip: we only point to it.

b) Choice cards, pairs (10 min) · Core: Code

- Pairs get two-picture choice cards: zebra crossing / busy road; hold a grown-up’s hand / cross alone; sit on a chair / stand on a chair; and the two-route grid mat.
- Pairs **point to the safe one**, hold up the thumbs-up card, and show the class.
- **Stretch:** explain why one route is safer.

c) Activity Book page (5 min)

- Tick the safe way. Not marked.

3. Share (10 min)

- **Create:** draw the safe way to cross the road.
- Optional Build: add a paper zebra crossing and busy road to the floor grid.
- **Close:** “Smart thinkers look at both ways, then choose the safe one.”

Common mistakes

- Choosing the faster way → “Fast is not always safe. Which way keeps Ayo safe?”
- Choosing without looking at both → “Look at both ways first. Then choose.”

What if it doesn’t work?

- No space for two routes → lay the two route mats on a table and use cardboard Ayo.
- No tape → chalk lines or skipping ropes.

Support and stretch

- **Support:** ask “Is this safe? Yes or no?” for each picture, then “So which one do we choose?”
- **Stretch** (optional, never assessed): explain why one route is safer.

How we check

Observation only. Tick each child who **chooses the safe way of two**.

> **Safety**
> The busy road is pretend: point, never walk on it. Walk on the safe route. Real roads: always with a grown-up.
