02 · Lesson spec

I Am a Thinker · 40 minutes · teams of 4 · fully unplugged · Term 3 integration

Goal	**I can use my thinking steps to solve Ayo's problem.**
Core parts	Move + Code
Key words	problem · small steps · safe way · another way · if · then
Materials	Taped grid with a box bread shop and Grandma's house; road-closed box; red and green cards; step cards (pick up bread, walk the safe way, give bread, go round); role cards; cardboard Ayo and paper bread

1. Watch (5 min)

- **Say:** "Ayo must take bread to Grandma, but today the road is blocked! You are **thinkers**. Let's use all our thinking steps."
- Count the thinking steps on your fingers: **1** What is the problem? **2** What are the small steps? **3** Which way is safe? **4** If the light is red, then…? **5** If it is blocked, try another way!
- Give the four jobs: **planner** (lays the cards), **Ayo** (walks the route), **checker** (points to each card), **light-holder** (shows red or green).

2. Bread delivery in teams (25 min)

- **Plan (Core: Code):** the planner lays 3 step cards: pick up bread → walk the safe way → give bread. The team says the plan aloud.
- **Act it (Core: Move):** "Ayo" walks the route on the grid while the checker points to each card.
- **Surprise!** The teacher puts down the road-closed box and the light-holder shows **red**. Ayo **stops**. The team changes the plan: swap "walk the safe way" for **"go round"**. Green → go!
- Teams take turns on the grid; waiting teams plan at tables. The teacher **photos** each plan.
- **Stretch:** add a second closed road, or make it a 4-step delivery.

3. Share (10 min)

Activity Book page (4 min): draw Ayo's way to deliver the bread. Not marked.

- **Create:** draw how Ayo got the bread there.
- **Close:** "You used all your thinking steps. You are thinkers!" (Reflection on the whole term waits for Week 13.)

Common mistakes

- Walking on red → light-holder: "Red! If red, then…?" (stop).
- Rebuilding the whole plan when blocked → "Which card is blocked? Swap just that one."
- Skipping "say the problem" → "Thinkers start with: what is the problem?"

What if it doesn't work?

- Team of 4 too big a job → teams of 3 (teacher is the light-holder).
- No grid → chalk squares or a paper path.

Support and stretch

- **Support:** the teacher says each thinking step as a question; the child answers one at a time.
- **Stretch** (optional, never assessed): second closed road, or 4 steps.

How we check

Observation only. Tick each child who **says the problem, plans 3 small steps, stops on red and finds another way**. Photo each team's plan.

> **Safety**
> Walk on the grid. Light, empty boxes. One team on the grid at a time. Stop on red; cross real roads with a grown-up.
